

Large Pane Windows and Doors

Pane widths – 'N' casements have a traditional 462mm (18 1/4") glass width in a fixed pane. Where wider proportions are preferred 'Z' casements have a 582mm (23") glass width.

Double glazing – All large pane windows and large pane doors can be double glazed. Both 14mm (DG Version) and 24mm (L Version) glass thickness can be accommodated.

Top Hung Fanlights – Windows suffixed with 'F' and 'V' are 305mm high and 285mm high respectively

Sublight – Window types marked * are also available without the lower sublight fixed pane.

Additional ventilation – All windows can be supplied with trickle ventilators to provide weather tight airflow through the top of the window.

Reversible windows – This style ensures safe cleaning and is ideal for multi-storey applications.

Chart Dimensions – All the dimensions listed are width x height.

Sidelights – Crittall advise specifying Corporate W20 sections if using sidelights in conjunction with double glazed doors, as they are manufactured with the same profile. This will ensure that the glazing bars match.

Horizontal Pane Windows and Doors

Pane width – Traditional 462mm (18 1/4") glass width in a fixed pane

Double glazing – All horizontal windows and doors can be double glazed.

14mm glass thickness can be accommodated using larger section glazing bar or heritage glazing bars. (See details on reverse)

Additional ventilation – All windows can be supplied with trickle ventilators to provide weather tight airflow through the top of the window.

Small Pane (Georgian) Windows and Doors

Pane width - Traditional 462mm (18 1/4") glass width in a fixed pane

Fitting – All window units are prepared for putty glazing but are also available with glazing beads if specially ordered. If the bead option is chosen a large size glazing bar is required. (See details on reverse)

Glazing bars – Crittall advise specifying larger glazing bar sections for small pane windows if using them in conjunction with small pane doors, as they are manufactured with the same profile. This will ensure a uniform appearance.

Double glazing – This is available in 14mm glass thickness using heritage glazing bars. (See details on reverse)
