

Real Bronze

Solid Cast Bronze has been used for centuries in the production of fine quality door and window fittings. For over 75 years, Frank Allart have been manufacturing real bronze furniture using skills and craftsmanship passed down through generations.

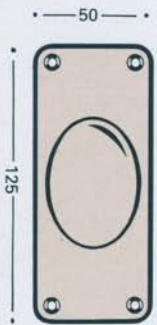

Offered in two forms, highly polished or antiqued, the real beauty of bronze furniture is how the surface finish matures. Unlike brass, real bronze is not protected with a lacquer coating. In the highly polished form the finish will either maintain its brilliance through handling, or age gracefully as the bronze oxidises.

This oxidized form is offered as an original finish and has always been a popular choice with discerning specifiers. Traditionally known as real bronze metal antiqued (RBMA), this unique iridescent patina is produced using a special process to rapidly oxidize the surface after highly polishing. The appeal of this finish is that, with constant handling, the oxide film will slowly wear down to reveal the beauty of the polished bronze beneath. Surfaces that are not handled, or are only handled occasionally, will retain their patina.

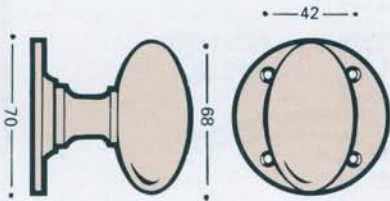

Both finishes will benefit from the occasional application of a good wax polish to maintain their sheen.

- floor mounted

2112 DOOR STOP

- floor mounted

2112T DOOR STOP

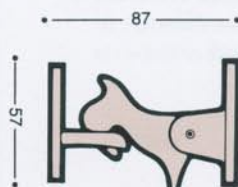

- floor mounted
- particularly suitable for use with deep pile carpets or stepped thresholds

0476 CABIN HOOK

- heavy duty

 lengths L : 76, 102, 152, 203, 254, 305

2108 DOOR HOLDER

- door to wall mounted
- automatic latching
- manual release

Our Special Product Service offers adaptations to standard products, special surface finishes, and the manufacture of bespoke designs.

Our Design Department, utilizing sophisticated Computer Aided Design equipment, has the capabilities, knowledge and experience to undertake all aspects of product design and development.

Please contact our Sales Department who will be pleased to provide a quotation against your requirements, with drawings and prototypes available upon request.
